
Proceedings of the
London Mathematical Society
Volume 94 Part 1 January 2007

Jorge García-Melián, Julio D. Rossi and José C. Sabina de Lis A bifurcation problem governed by the boundary condition II	1–25
Youn-Seo Choi Tenth order mock theta functions in Ramanujan's lost notebook III	26–52
Ciprian Foias, Luan Hoang and Basil Nicolaenko On the helicity in 3D-periodic Navier–Stokes equations I: the non-statistical case	53–90
Yucui Su and R. B. Zhang Cohomology of Lie superalgebras $\mathfrak{sl}_{m n}$ and $\mathfrak{osp}_{2 2n}$	91–136
Patrick Ingram Diophantine analysis and torsion on elliptic curves	137–154
Jonathan Brundan and Simon M. Goodwin Good grading polytopes	155–180
Frédéric Bayart and Sophie Grivaux Invariant Gaussian measures for operators on Banach spaces and linear dynamics	181–210
T. Dokchitser and V. Dokchitser Computations in non-commutative Iwasawa theory. With an appendix by J. Coates and R. Sujatha	211–272
