**Proceedings** of the  
London Mathematical Society  
Volume 94 Part 2 March 2007

<b>Monica Ilie and Nico Spronk</b>	The spine of a Fourier–Stieltjes algebra	273–301
<b>Alexander S. Kechris and Christian Rosendal</b>	Turbulence, amalgamation, and generic automorphisms of homogeneous structures	302–350
<b>M. Brun</b>	Witt vectors and equivariant ring spectra applied to cobordism	351–385
<b>K. Bruce Erickson and Ross A. Maller</b>	Finiteness of integrals of functions of Lévy processes	386–420
<b>S. Belhaouari, T. Mountford and G. Valle</b>	Tightness for the interfaces of one-dimensional voter models	421–442
<b>R. G. Halburd and R. J. Korhonen</b>	Finite-order meromorphic solutions and the discrete Painlevé equations	443–474
<b>Nate Harvey, Alexander E. Holroyd, Yuval Peres and Dan Romik</b>	Universal finitary codes with exponential tails	475–496
<b>Pierpaolo Esposito, Monica Musso and Angela Pistoia</b>	On the existence and profile of nodal solutions for a two-dimensional elliptic problem with large exponent in nonlinearity	497–519
<b>Pierre-Emmanuel Caprace and Bernhard Mühlherr</b>	Reflection rigidity of 2-spherical Coxeter groups	520–542
<b>Haseo Ki</b>	Corrigenda: All but finitely many non-trivial zeros of the approximations of the Epstein zeta function are simple and on the critical line	543–544
